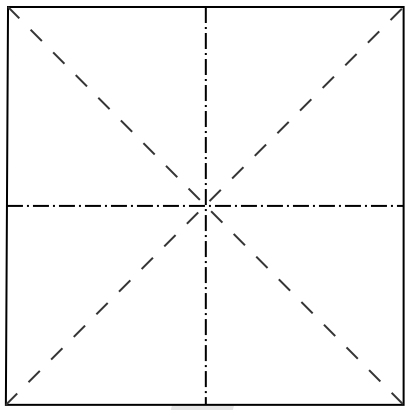
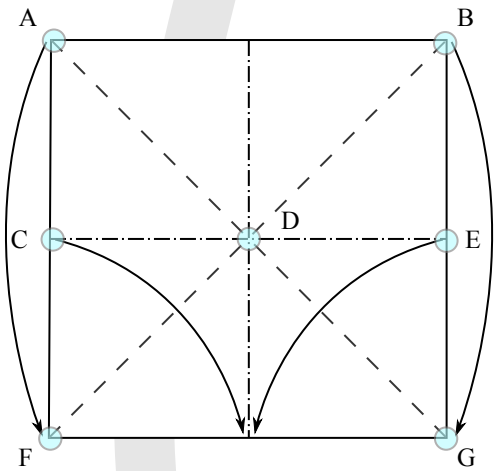
Android Head

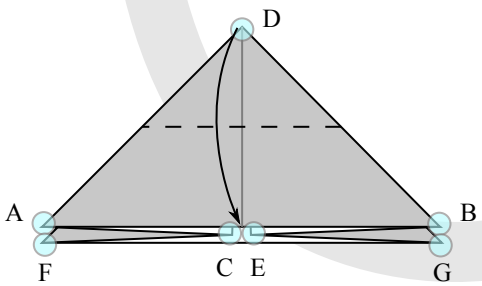
Lisa Nguyen Quang Do
August 2020
Double-sided 15 x 15 cm



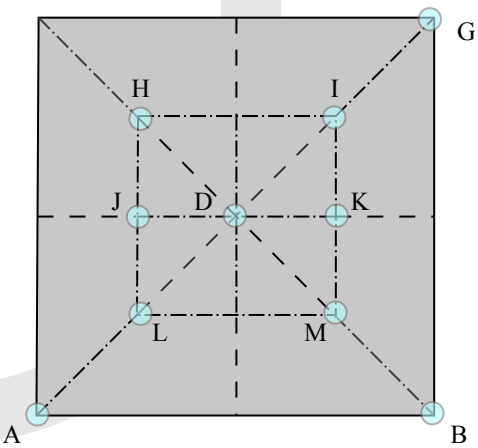
1. Start white side up. Valley fold the diagonals. Mountain fold the medians.



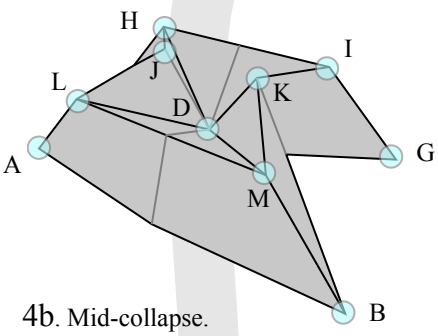
2. Use the existing folds to collapse the model.



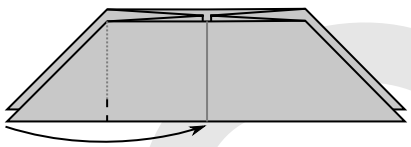
3. Waterbomb base. Fold through all layers and unfold everything.



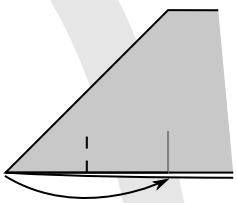
4. Make the existing folds into mountain / valley folds as shown above, and collapse the model.



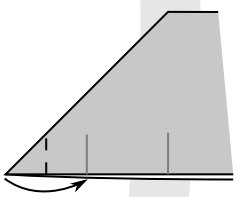
4b. Mid-collapse.



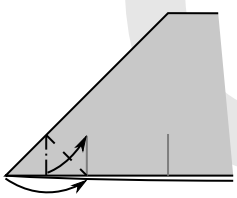
5. Fold in half. Only pinch the bottom. The next steps are a close up of the left corner.



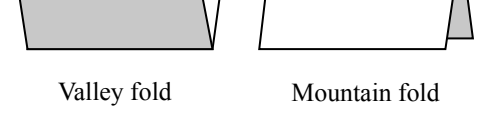
6. Fold in half and pinch the bottom.

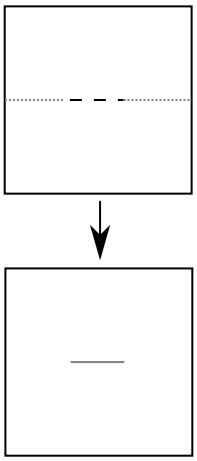


7. Fold in half again.



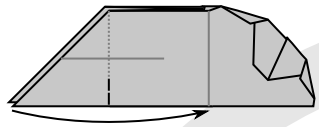
8. Open the layers.



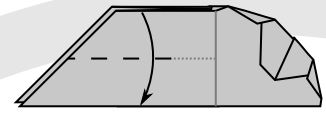


Pinch: only mark the paper on the – – – –

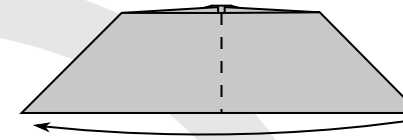
Legend



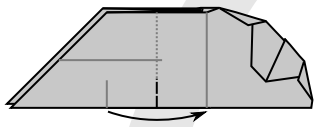
20. Pinch the bottom.



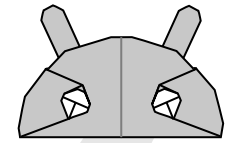
19. Fold one flap in half.
Only pinch the left side.



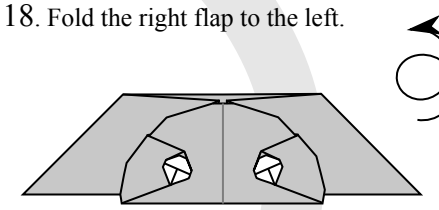
18. Fold the right flap to the left.



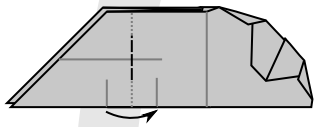
21. Pinch the bottom.



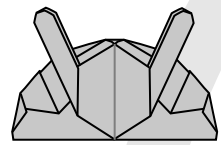
30. Model complete!



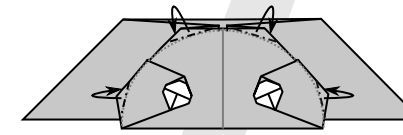
17. Turn over.



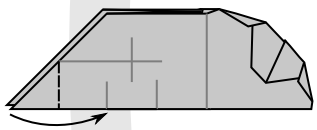
22. Pinch the middle.



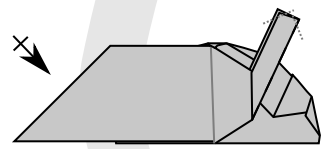
29. Turn over.



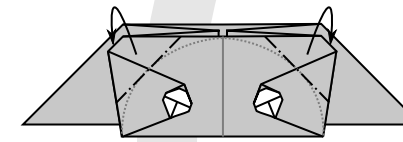
16. Continue rounding the corners to taste.



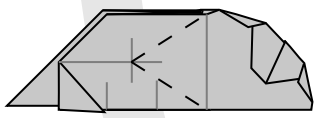
23. Fold in half.



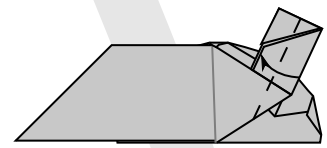
28. Round the corners of the antenna.
Repeat steps 18-28 on the other side.



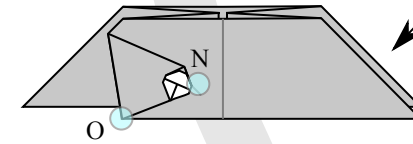
15. Fold the extra paper behind
to shape the head.



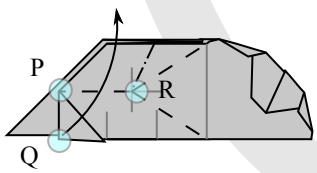
24. Make two valley folds using
the middle pinch as a reference.



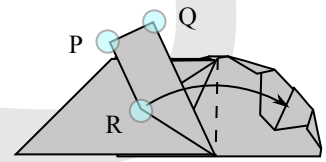
27. Fold in half.



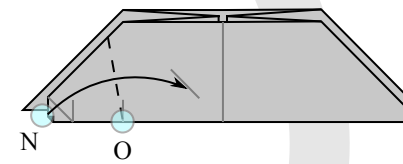
14. Repeat steps 5-13 on the other side.



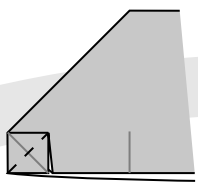
25. Fold the flap up using the three
existing valley folds. Then, flatten it.
The mountain fold forms naturally.



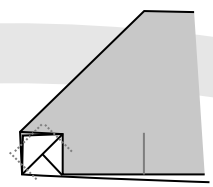
26. Fold the flap back to the right.



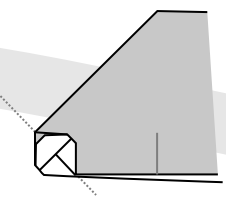
13. Fold up to place the eye. To make
the fold, use O as the start of the fold
and place N on the pinch.



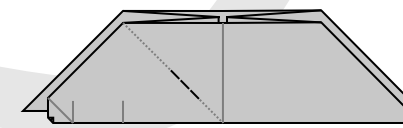
9. Fold one layer
up to reveal the
color change.



10. Fold three corners behind
to round the shape of the eye.



11. Swivel the eye
around the axis.



12. Full view. Pinch part of the diagonal.
